DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10 May 2005 has been entered.

Election/Restrictions

2. Claims 1 and 2 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 26 April 2003.

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1634

5. Claims 3-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter that was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

6. The amendment of 11 April 2005 amended claims 3-11 by deleting the term "device" and inserting the term "kit." A word search of the pregrant publication of the instant application fails to locate any use of the term "kit." Accordingly, the aspect of now claiming a method drawn to a "kit" is considered to constitute new matter.

7. Claims 12 and 13 fairly encompass any and all manner of biopolymers, e.g., nucleic acids, be they DNA, mRNA, tRNA, rRNA, lipids, proteins, glycoproteins, antibodies, antigens, etc. A review of the disclosure fails to find an adequate written description of the biopolymers that are required to be present on the slide glass. Indeed, a review of the disclosure fails to find where any Sequence Listing for any protein or nucleic acid has been filed.

8. The failure to provide any description of said biopolymers effectively proscribes the public from being able to determine which biopolymers are encompassed by the claims from those that are not. Accordingly, the specification does not reasonably suggest that applicant was in possession of the invention at the time of filing.

9. For the above reasons, and in the absence of convincing evidence to the contrary, claims 3-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement.

Art Unit: 1634
